DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 7-27, 29-39, and 51-74 are allowed over prior art.
2. The following is a statement of reasons for the indication of allowable subject matter: One of the limitations not taught by the prior art is a children's ride-on vehicle including an electronic speed controller for regulating after receiving a user input the rate at which a rotational input command is transmitted to the driven wheels of the vehicle according a predetermined transmission profile in which the selected rotational input is incrementally transmitted to the driven wheel assembly. Furthermore, the prior art does not describe a children's ride-on vehicle including an electronic speed controller adapted to regulate the rate at which a selected rotational input is transmitted to the driven wheels of the vehicle, the speed controller regulates the transmission of a first percentage of the selected rotational input to driven wheels upon receipt of a user input, said first percentage is less than 100% of the selected rotational input, upon transmission of the first percentage of the rotational input, at least a second percentage of the rotational input is transmitted to the driven wheels. Additionally, the prior art does not disclose a children's ride-on vehicle including an electronic speed controller adapted to regulate the rate at which a selected rotational input is transmitted to the driven wheels of the vehicle, the speed controller includes a microprocessor which regulates the actuation of a motor assembly by using duty cycle ramping. Finally, the prior art does not disclose a children's ride-on vehicle including an electronic speed controller adapted to regulate the rate at which a selected rotational input is transmitted to the

driven wheels of the vehicle, the speed controller includes a microprocessor that regulates the transmission of the selected rotational input through pulse width modulation.
